Laboratory Members and DuraMAT Partner(s) collectively referred to as ("Parties") or individually referred to as ("Party");

The Parties wish to discuss information relating to the Consortium with each other with a purpose to discover, develop, de-risk, and enable the commercialization of new materials and designs for PV modules, and discuss with the DOE as necessary ("Purpose"), and in the course of such discussions, it may be necessary for the Parties to disclose proprietary technical and business information with potentially patentable information, proprietary technical and business information referred to herein as ("Proprietary Information").

To the extent that the Parties receive or are given access to any identified and marked Proprietary Information, the Parties shall use the same degree of care that they use to protect their own proprietary information or potentially patentable information of a like nature (but no less than a reasonable degree of care) to maintain such information in confidence, to use such information only for the Purpose, to disclose such information only to its employees who need to know the information for the Purpose, and to make no further disclosure of such information without the prior written permission of the disclosing Party. The effective date of this Agreement shall be determined by the date the DuraMAT Partner signs this Agreement, or in the case of multiple DuraMAT Partners, the date the last of the DuraMAT Partners to sign ("Effective Date"). This Agreement shall be in full force and effect for a period of two (2) years from the Effective Date. Any Party may terminate its participation in this Agreement with thirty (30) days written notice to all the other Parties. In no event will receiving Party be in breach of this Agreement for its good faith compliance with applicable law.
5. This Agreement does not create any obligation upon a Party to provide information to another Party. This Agreement does not create a joint venture, partnership, or other form of business association between the Parties.
